

assessment in Shanghai, China. This program is administered by the American Petroleum Institute and involves the University of Colorado, Applied Health Sciences (epidemiology), Fudan University (China) and ExxonMobil Biomedical Sciences (exposure assessment).

I could go on if you need more information. Please let me know. Note that if more detail is needed, particularly for Solvents and EO/EG, I will have to seek this information from my colleagues.

Subject: RE: HSE Cost Study ToR

Stuart,

Jan van Dijk was wondering to what laboratories part of the \$ 3.1 mln is being spent. Or who is performing the work what leads to this spending? It doesn't need to be a long list but if you could give us an idea for what the money is being spent would help.

Thanks in advance.

with kind regards,
Peter

Peter:

Budget items are wide and varied. Please let me know what level of detail you are interested in. As Alicia and Chuck mentioned, the projects have been reviewed and generally agreed to by the affected PBUs.

Stuart
