

AIR RESOURCES BOARD

1102 Q STREET
P.O. BOX 2815
SACRAMENTO, CA 95812

August 21, 1990

Dear Sir or Madam,

Final Draft Report to the Scientific Review Panel on Vinyl Chloride

The enclosed final draft report on the proposed identification of vinyl chloride as a toxic air contaminant is sent to you for review and comment. The report will be submitted to the Scientific Review Panel (SRP) for review at its September 6, 1990 meeting; the SRP meeting notice will be issued later.

The final draft report to the SRP consists of an Executive Summary and Parts A, B, and C. Part A, compiled by the Air Resources Board (ARB) staff, discusses the uses, emissions, atmospheric persistence, and exposure to ambient as well as indoor concentrations of vinyl chloride. Part B, compiled by the Department of Health Services (DHS) staff, discusses the effects of vinyl chloride on public health and the risk of exposure to ambient air concentrations. Part C contains the ARB/DHS responses to public comments received during the comment periods.

As you may recall, there have already been two opportunities to comment on this report. The Second Draft of the report included revisions as a result of comments on the Preliminary Draft Report. Please note that the SRP does not accept written or oral testimony at its meetings.

If you have any questions regarding the report on vinyl chloride, please contact Barbara Cook of the Substance Evaluation Section at (916) 327-5625.

Sincerely,

A handwritten signature in dark ink, appearing to read "Donald J. Ames".

Donald J. Ames, Assistant Chief
Stationary Source Division
