Subject Medical Removal

Date April 1, 1982

Reference

Copy to: Dr. Boyd
J. Caporossi - NA
Dr. J. Tobin - NA

Effective March 30, 1982, [REDACTED] (Blender-Packer) has been removed from his normal job as his blood lead with a recheck is over 60 (62 & 64).

We have assigned him to the janitor's duties cleaning the office, lunch room, locker room and outside plant areas. He will wear a half face respirator with high efficiency cartridges.

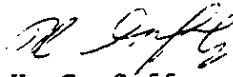

I have personally reviewed the situation with Mr. [REDACTED] and followed with a letter.

Dr. Tobin -

Is it necessary to have special medical attention for this employee during his medical removal?

Copy to: LeRoy
Foreman

Subject: Blood Lead Program

To reduce the blood lead level of those employees above .045, employees will be required to keep their respirator on at all times except lunch and regular breaks. This includes wearing the respirator when in the rest rooms, locker room, or anywhere else. Since the foreman check respirator seals at break and lunch, this will ensure each employee has a good seal. The program will be enforced by the foreman, LeRoy, and myself.
