

May 5, 1948

Mr. E. O. Jones,
Ethyl Corporation,
Chrysler Building,
New York City 17.

Dear Ollie:

On the occasion of your visit, some time ago, I promised to send you copies of the various items of formal correspondence between officials of Ethyl Corporation and the United States Public Health Service, with reference to changes in the proposed regulations as issued following the investigation of the Public Health Service in 1925. I believe you will find all of these items, as far as they are represented in my files, in the material attached hereto. You will remember, of course, that the standards, with reference to the concentration of dye in commercial leaded gasolines of various kinds, have been established from time to time by negotiation, but have not been set up in any specific regulatory paragraphs. Otherwise this is the crop.

Sincerely yours,

Robert A. Kehoe, M. D.
