Sure, I use...
DUTCH BOY
ALL-PURPOSE
SOFT PASTE
WHITE-LEAD

7-3-54

... and, for good reasons, too

First... Soft Paste Saves Time

... and it's ready for the brush

No paint can be properly made ready for the job in less time than Dutch Boy All-Purpose Soft Paste. To a painter who has never used this easy-mixing white-lead this may be hard to believe. Not on more than one occasion the entire process from opening the keg to dipping up the first bushful of paint has been carefully timed. In no case has it taken more than SIX MINUTES FOR A HUNDRED OF LEAD over six gallons of paint at the rate of a gallon a minute. That's time-saving for you!
