DATE : April 21, 1981

cc: D. J. Metherd
J. A. Munoz

SUBJECT : WIPE TESTS INSIDE DEPARTMENT 237 COLUMN

REFERENCE :

TO : P. Kirk

Fred Hileman of Dayton Lab phoned the results to me. The amounts found are very low and could not have been measured accurately by any other lab. These numbers include a factor of 2.5 to allow for 40% recovery.

	Column 3rd. Level	Top of Column	Column at Open
	Sample 1	Sample 2	Top Wall Sample
	ng/100 sq cms	ng/100 sq cms	ng/100 sq cms
Tetra	12	8	15
Penta	45	64	56
Hexa	120	44	31
Hepta	31	9	0
Octa		Trace	

These levels are lower than OSHA would expect to find in the workplace area-not inside a process vessel. Fred Hileman thinks you did an excellent cleaning job.
