FROM (NAME & LOCATION) PATENT DEPARTMENT - GENERAL OFFICES E2NB

DATE November 24, 1975 CC

SUBJECT PCB PLANS

REFERENCE

TO : J. R. Savage - B2SL

I have only two suggestions for the PCB Contingency Plan, both of which pertain to Case I.

Case I, Section II, Item (3)

Regarding termination of existing contracts with customers, the Law Department should probably be brought in to assess any risks caused by such terminations even though the cause clearly appears to be a "force majeure" occurrence.

Case I, Section II

Suggest adding a new item (11):

> "Establish a licensing (or non-licensing) policy for all those replacement fluids which are the subject of issued or pending patents."

The Patent Department will work with the Business Group (particularly Marketing) on this matter.

William H. Duffey

WHD:rk

P.S. - Jim, it is my understanding that I am not expected to attend the Task Force Meetings on a regular basis. I will remain available, however, for assistance on patent matters as they arise.
