DOCUMENT DESCRIPTION: 1973 Memo to district managers from T Egan

Jack McDougall

ZONOLITE

CONSTRUCTION PRODUCTS DIVISION

TO: District Managers — April 11, 1973

FROM: Tom Egan — CC: R. deBastian

To follow up on my recent conversation, please see that the following format is understood by you and your people. It will be necessary to get this information to those contractors who have contracts to supply Mono-Kote 3.

1. The Environmental Protective Agency has issued a standard for the control of asbestos emission and was effective April 5, 1973.

   It is our opinion, based on conversation with the E.P.A. and our understanding of the regulation, that the spraying of Mono-Kote 3 can continue until July 4, 1973. (90 days from April 4, 1973)

2. Understand that the regulations affect the user (contractor) and they must comply with the law.

3. Our policy will be:

   a. Production of Mono-Kote 3 will cease no later than June 23, 1973. (80 days after enactment of the regulations.)

   b. Communication and coordination must be established with those contractors actually spraying Mono-Kote 3 to allow production and shipment of Mono-Kote 3 to them for use within the noted date.

   c. If present supplies of asbestos materials, in plant, are used prior to that date, we must note each plant production termination date based on that fact. (We must not get caught with dead inventory of asbestos.)

4. There will be differences in mixing and pumping of Mono-Kote 4 or Mono-Kote 5 and you should contact Bob deBastian about those differences to advise the contractor.

5. All applicators have been advised of the use of Mono-Kote 5 after August 1 at the list price of $2.90 F.O.B. plant. This does not mean we will stop Mono-Kote 4 production at that time. However, we must not be <u>starting</u> Mono-Kote 4 jobs <u>after</u> August 1.

The distribution of this information is your responsibility and I'm confident will not be a problem. Be assured that we will be receptive to talking over any problems on any item 1 through 5 noted with you and/or the applicator.

Thanks for your cooperation.
