re: Jean Hanel

Dear Doctor Kehoe:

Thank you for your concern about our mutual patient. It would seem as if the easiest way to summarize this patient's problem would be to send you copies of the records which I recently sent to Dr. Harriet Hardy of Massachusetts Institute of Technology.

Miss Hanel retains the feeling that she has been poisoned by lead and chromium and she has continued to write in a typically irrational manner to top medical personnel throughout the country.

Enclosed please find the pertinent information which has been gathered over the years. I would appreciate it if you could return the records at your convenience. Of course, any help that you could give this patient would be greatly appreciated.

Yours very truly,

Richard A. Carlson, M.D., F.A.C.P.
