Occupational Health Programs are concerned with all aspects of a worker's health and his relationship with his environment. The basic objectives of our Occupational Health Program are:

1. To protect employees against health hazards in their work environment.
2. To facilitate placement and ensure the suitability of individuals according to their physical capacities.
3. To assure adequate medical care and rehabilitation of the occupationally injured.
4. To encourage personal health maintenance.

In order to attain these objectives, the medical department is carrying out the following functions:

1. Pre-employment physicals.
2. Special physical examinations for placement.
3. Annual physical examinations to measure and monitor that our employees are being protected against health hazards associated with our industry.
4. Treatment and rehabilitation of occupational injuries.
5. Providing personal treatment for minor illnesses.
6. Acting as a consultant to employees regarding personal health and maintenance.
7. The Industrial Hygiene Department also plays an important role in reaching the objectives. In addition to monitoring the workplace and recommending safety equipment, this department trains personnel in the use of respiratory equipment and fit tests the equipment to the individuals.
