Dear Susan:

I have just spoken to Nancy Wheeler about the program to determine the pay type proportions before and after 1941 at Texas City.

She had used the wrong field to select on and has provided us with revised data. The corrected table is below:

| <u>Pay Status</u> | <u>After 1941</u> | <u>Before 1941</u> |
|-------------------|-------------------|--------------------|
| Miscoded          | 10                | 0                  |
| Hourly            | 4438 (69%)        | 18 (16%)           |
| Salary            | 1413 (22%)        | 47 (43%)           |
| Both              | 617 (10%)         | 45 (41%)           |
| Total             | 6478              | 110                |
