Subject: Genetically Engineered Mosquitoes

Dear Nancy,

PLEASE, NO!!

What are you people thinking?

There have been no environmental or human health studies and GMO mosquitoes cannot be recalled once they are released. Once they're out, there is no recall. And once Oxitec has their mosquitoes out in Florida and Texas, you can be sure they'll do it in other states. Oxitec either can't or refuses to satisfy basic questions about the potential long-term environmental or health impacts of these lab-created insects. Not needed. Not wanted. Not proven safe.

What's wrong with the "mosquito fish" – a guppy-like, native freshwater fish? It's been proven effective.

Thank you for reconsidering the dangerous and unproven method of GM mosquito releases.
