measurements around the toll plaza, the toll taker's booth in order to determine the amount of asbestos in the air.

Q In that site the cars pull up to the tollbooth, stop, pay the toll and go up on the bridge?

A Yes, sir.

Q Is there a little wind there?

A Yes, sir, constant.

Q It is not indoors, is it?

A It is not indoors.

Q Did you find what you consider to be meaningful levels of asbestos exposure from that study?

A Yes, sir.

Q In addition to the work that you did outside of the tollbooths at the Bay Bridge, have you also done any studies at the requests of business employers or others inside garage context or repair shop context to determine if there is any asbestos released from the use of friction materials?
