

External Meeting Request Form for Administrator E. Scott Pruitt

U.S. Environmental Protection Agency

To request the Administrator to attend and/or speak at your event, please complete and submit the following form.

Today's Date:
July 19, 2017

Meeting Date:
No specific date requested.

Meeting Time:
N/A

Requested Location (if offsite, please list address, parking instructions, etc.):
EPA Headquarters – Washington, DC

Requestor:
Mr. Andrew Littlefair, the President and CEO of Clean Energy Fuels, is requesting a meeting with Administrator Pruitt.

Purpose of the Meeting:

Per my conversation with Ryan Jackson, Mr. Littlefair would like to meet with Administrator Pruitt to discuss the recent technological advancements in terms of natural gas vehicles and how it will help to address issues in non-attainment areas under the Clean Air Act. The new generation of Near Zero NOx emissions natural gas engines, while using renewable natural gas, has an emissions profile that can compete, and in many cases exceed, the emissions profile of electric vehicles when drawing electricity from the grid.

Mr. Littlefair would also like to discuss how a more robust natural gas vehicle industry can create thousands of additional U.S. jobs, and how using a domestic fuel can make our country safer and enhance our national security

Background on the Meeting:

Mr. Littlefair is the President and CEO of Clean Energy Fuels. Clean Energy is the largest provider in North America of natural gas used as a transportation fuel. Natural gas is now used as a transportation fuel in motor vehicles, railroad locomotives, and in marine vessels.

Mr. Littlefair and T. Boone Pickens founded Clean Energy nearly two decades ago. Andrew has been a leader in the natural gas industry, having served as the former Chairman of Natural Gas Vehicle America (NGVA), the natural gas vehicle industry trade

association.

Role of the Administrator:

Mr. Littlefair would like to provide the Administrator with information on new technological advancements in the natural gas vehicle industry. With the war on fossil fuels, natural gas as a transportation fuel is extremely competitive when it comes to the environment, including when compared to electric vehicles.

Attendees:

Andrew Littlefair – President and CEO, Clean Energy Fuels

Jim Hooley – Vice President, Clean Energy Fuels

Scott Lane – Consultant, PACE
