

1 the same percentage of asbestos, 13 to 25 percent
2 amosite and chrysotile.

3 Again, Doctor, assuming those facts to be
4 true, do you have an opinion, to a reasonable degree
5 of medical certainty, as to which, if any, exposures
6 to that pipecovering and block, Kaylo, would have been
7 substantial contributing factors to the development of
8 his malignant peritoneal mesothelioma?

9 MS. TOSTANOSKI: Objection.

10 THE COURT: Overruled.

11 A Yes, sir. It is, again, my opinion for the
12 same reasons that all of those exposures contributed
13 to the development of his mesothelioma.

14 Q And would the basis and reasons for that
15 opinion be as those that -- the same as you have
16 previously expressed?

17 A Yes, sir.

18 Q I have one more question, Doctor, that is a
19 hypothetical question.

20 And I want you to assume that, off and on
21 for a period of about a year from 1958 to 1959, off
