Subject: DU PONT CORP.
PROTECTIVE CLOTHING - MANVILLE ASBESTOS TEXTILE PLANT

Manville Asbestos Textile Plant has been providing for its workers protective clothing made from Du Pont's Tyvek olefin fiber. The attached letter from Mr. Robert W. Slavin of Du Pont requests permission to visit Manville Asbestos Textiles and assess our usage of coveralls made from their material as a possible case history.

I suggest that permission be granted for Mr. Slavin to visit Manville Textiles but that no further steps be taken until we have a written proposal from Du Pont as to their publicity plans.

As far as the Division is concerned the proposed visit is O.K.

Attach.
