Mundet "Jointite" Corkboard

—for all low temperature insulation and for acoustical correction. 100 per cent pure cork, fabricated in accordance with U. S. Government Master Specifications and unsurpassed in its field. Sold in standard 12 in. x 36 in. sheet. Standard thicknesses, ½ in., 1 in., 1½ in., 2 in., 3 in., 4 in., 6 in.

Mundet "Jointite" Cork Pipe Covering

Shown below, with fitting cover. Protects all types of low temperature lines. Made in 3 thicknesses, with complete line of standard covers, suitable for pipes carrying sub-zero to 50 F temperature.

Section of Mundet Moulded Cork Pipe Covering, with fitting. The pipe covering is made in sections 36 in. long, to fit all sizes of pipes.

Mundet Cork Vibration Isolation

Machinery vibration encountered in heating and ventilating work is effectively controlled by the use of Mundet Natural Cork Isolation Mats. These consist of blocks of pure cork, held together within a rigid steel frame or bound with asphalt

paper applied with hot asphalt top and bottom. Mundet steel bound mats are usually used under exposed mounts; asphalt paper bound mats under concrete foundations of the envelope type. Mats are made to fit under any type of machine foundation. For loads exceeding 2000 lb per square foot, we manufacture Mundet Machinery Isolation Cork, which is a board form of compressed granulated cork, available in 3 densities. All types of isolation are furnished in 1 in., 1½ in., 2 in., 3 in., 4 in., and 6 in. thicknesses, depending on class of service.

Above close-up of Mundet Natural Cork Isolation Mat shows how the blocks of cork are held together within a steel frame.

Engineering and Specification Service

Our engineering department is at the service of Architects and Engineers, to assist and advise in the preparation of specifications pertaining to cork. This service is also available without obligation to any one who has a low temperature insulation or a vibration isolation problem. Our complete catalogue is filed in Sweet's Catalogue File for Engineers and Architects and will be sent on request. It is replete with information and data of value to every specification writer whose field touches our products.

Mundet Contract Service

Covers the complete installation of our products, in accordance with best established practice. Divided responsibility is avoided. All materials and workmanship are guaranteed.

National Gypsum Company, Buffalo, N. Y.

Manufacturers of

ROCK *Gimco* WOOL

Rock Wool Plants located at
ALEXANDRIA, IND.

DUBUQUE, IOWA

DOVER, N. J.

The Gimco Sealal Batt is probably the most frequently used insulating material on the market today. It is easy-to-handle, quick-to-apply, and unexcelled as a heat barricade. The Sealal Batt fits snugly between standard studdings and joists. Its semi-rigid quality eliminates need of extra support and insures against sagging.

Gimco Bats are Self-Supporting—Gimco bats need only to be pushed between studdings or joists. Their own natural resiliency holds them permanently in place without additional support. Application costs are thus cut to a minimum.

Gimco Insulation for Present Homes—Gimco in granulated form can easily be blown into empty wall and ceiling spaces. It makes a permanent "wall-thick" insulation, and can be installed in any home, regardless of age, size or type of construction. For complete details, write National Gypsum Company, Buffalo, New York.

SPECIFICATIONS—Gimco Sealal Batts are furnished with vapor-proof paper backing. They are made in two sizes: (1) 15 x 23 in. x wall thick; (2) 15 x 48 in. x wall thick. Gimco Sealal Batts are also available in a Double thickness (approx. 2 in. thick) in the same sizes as the Full thick Sealal Batts.

GIMCO ROCK WOOL PRODUCTS FOR INDUSTRY

Flexfelt Blankets—Efficient and adaptable rock wool insulation for boilers, heaters, furnace breachings, hot tanks and other industrial equipment. Recognized and accepted as one of the most rugged, durable insulating materials used by American industry. Besides unsurpassed insulating values, it provides fire protection, sound absorption and is adaptable to temperatures up to 1250 F.

Gimco No. 340 Insulating Cement—To Engineers who are concerned with heated apparatus, Gimco 340 Insulating Cement is no stranger. For years, Gimco has been their standby for all types of jobs where an insulated cement covering is needed—jobs ranging from a small heating furnace to a coating for giant boilers.

The Gimco Industrial Batt provides the most efficient and economical type of block insulation. Industrial Batts properly applied to heating and air conditioning ducts insures you of unexcelled insulating qualities. For encased application . . . in Industrial Oven and Heater Panels . . . around tanks . . . and on many types of heated equipment operating up to 800 F, the application of Industrial Batts is both highly adaptable and well recommended.
