Department of Preventive Medicine and
Industrial Health,
Kettering Laboratories,
College of Medicine,
Eden Avenue,
CINCINNATI 19,
O H I O .

Dear Dr. Kehoe,

Thank you for your letter of May 12th, with its kind invitation to visit you in Cincinnati. I am grateful for your comment that you do not consider that lead is likely to have any significant association with cancer, and that this is not the direction of your research into lead compounds at present. I think it would be wiser, therefore, to defer my visit until some time when I may have more definite evidence.

Thank you for your invitation and look forward to the possibility of visiting you at some future date when I shall be less rushed.

Yours sincerely,

Dr. A. G. Cattle.
Head : Cancer Research Unit of the
National Cancer Association of S.A.
