DOCUMENT DESCRIPTION: Letter to North American Asbestos Corp. from Pabco Industrial Insulations RE Asbestos Problem

October 21, 1965

Mr. Robert Cryor
North American Asbestos Corporation
141 West Jackson Boulevard
Board of Trade Building
Chicago, Illinois 60604

Dear Bob:

Betty and I certainly enjoyed ourselves Sunday night with the Cryors, the Rileys, and the Crawfords. Someday when you and your "bride" have the time, we would like to show you our home in Berkeley.

I am sorry I had to run out of our meeting Monday, September 27, but Don and I had a lot of things to cover and I just did make the plane to Kansas City.

I am sure our asbestos problem there is in good hands and hasten to tell you the quality of the product has improved since we have been able to use the fiber we desire.

I meant to discuss this with you when we were togather, but we had so many other problems that I just never got around to it. I would like to ask you if you could furnish us all the information you have about Sprayed Insulation. As you know, there are at least seven manufacturers of various types of products being used at the present time. Several of these make their product from Amosite Asbestos. I believe that we might be able to make a satisfactory production using some of the current trimmings from our ~~Carbon~~ Silicate Insulation manufacture, plus Amosite fiber, plus binders, etc.

Calcium

I was in and out of Chicago twice on this trip but each time I was changing planes for some new destination and didn't get a chance to telephone you. I hope your trip with the Ruppert Rileys was a success.

Very truly yours,

H. P. Hoopes, Product Manager
Pabco Industrial Insulations
