A. R. Fisher

Saranac Studies of Asbestosis

Confirming our phone conversation, Saranas said they were unable to reproduce the manuscript made for publication and suggested that we wait until the article is published within the next few months. Attached is a letter of September 22 from Dr. Vorwald covering this point.

Inasmuch as the previous asbestos study, which was approved by ourselves and the other members of the underwriting group, is presumably the same as that now prepared for publication, there is little to be lost by waiting for the article itself to come out in the Archives.

Since Dr. Ken Smith and others at Asbestos have copies of the study that was submitted, nothing would be aided by having at this time the article that is to be published.
