

November 29, 1926.

Dr. John A. Johnston,
Citizen's Bank Bldg.,
Cannonsburg, Pa.

My dear Doctor Johnson:

I should like very much [REDACTED] the privilege of seeing again your patient, Mr. [REDACTED], whom I saw in the Cannonsburg Hospital some days ago. If you have no objection to my doing so I should like to have a consultant physician from Cincinnati see him with me. If this is agreeable to you I should like to arrange to see him on some day of this week, and I should be very glad if you would tell me at your earliest convenience whether we may see him and whether he is still at the Cannonsburg Hospital, or if not, where he can be seen.

You will remember my deep interest in this case because of its bearing on public health work, and I am very anxious to follow him up and see what is the course of his illness.

I received a note from the superintendent of the Hospital at Cannonsburg some days ago requesting such information as we were able to obtain as a matter of record in the hospital. As yet we have not completed the analysis of the specimens which were sent to us, the analysis being a somewhat long and laborious process. In due time, however, the analysis will be finished and I shall be glad to make report to you and to the hospital of our findings. I should be glad to have you indicate to me just what statement of findings is desired for the hospital records, whether there should be included a complete record of the findings made on physical examination together with an opinion as to the diagnosis, or whether what is desired are merely the specific laboratory findings.

You may address me at the College of Medicine, Eden and Bethesda Avenues, Cincinnati, Ohio. I shall esteem it great courtesy if you will give me the privilege of seeing your patient again.

Very truly yours,

RAK:OJ
