

429 - Protective Devices for Respiratory organs -

Chicago, March 16, 1937

Mr. C. M. House -

Referring to your letter of February 15th relative to the Illinois Occupational Disease Act, effective October 1, 1936 and your letter of June 12, 1935 concerning Baltimore CMP&E Shop Bulletin 152. We arranged at that time to comply with this SB-152 and take care of the situation at Lincoln St, Glenn and East Chicago,

To comply we should have four respirators at Glenn due to the handling of asbestos and the flue boring, Lincoln Street three and one at East Chicago.

There is considerable difference in these respirators and we have made somewhat of a standard of them on the Terminal- I can place requisition for the three for Lincoln St. and one for East Chicago, and you will please advise what I might say to Mr. Woltemade on placing four for Glenn to comply with this law, as I feel we are liable to have a Factory Inspector call on us at any time.
