WORK REQUEST #66-507
PRIORITY A

RESEARCH JFQ
M. W. TOUCHETTE

BACKGROUND:

The dolls which I have given to you are the subject of a complaint against NOCAN. The dolls are slush molded, one of which contains S-214. The S-214 doll lost plasticizer to the clothes in which the doll was dressed. The Bowflex 1001 doll was satisfactory.

For NOCAN we need to substantiate that the S-214 was the culprit. The doll formulation contains a large quantity of stabilizer, and there was some doubt in Ron Trump's mind whether the plasticizer or the stabilizer was migrating.

ACTION:

By straining the material, the plasticizer from the S-214 doll readily exudes. Please collect some exudate and verify that it is plasticizer.
