Library
Montreal

As you have requested for Henry Jongsma, I am sending the copy of Graham and Darby's paper on "Improved Light Stability for Plasticized PVC." I am forwarding your request for the two books, Plasticizer Technology Vol. I by Bruins and Stabilization of PVC by Chevassus and Broutelles, to our library for an inter-library loan. Incidently, it would probably be helpful to Henry to have these two books available for him permanently.
