POISE Latex Flat Wall Paint

New POISE is an entirely new interior finish developed by O'Brien research—a perfected flat wall latex formulation for new high fashion beauty plus the advantages of...extra hiding...easier brush and roller application...fast 30 minute drying...true washability.

High quality POISE—in beautiful *fashion tint* colors is the best of all paint values.

DIRECTIONS FOR USE

Preparation—Surface should be washed perfectly free of kalsomine, dirt, grease, glue size or soluble casein paints. Cracks and nailholes should be filled with a patching plaster, and when dry, sanded smooth.

CAUTION—Glossy surfaces must be dulled by scrubbing with a scouring powder, steel wooling, sanding or by wiping with O'Brien's Tack-it.

New Unpainted Surfaces—1st coat, use new POISE. (Over unpainted wood or metal always use an O'Brien oil base primer before applying first coat of Poise). 2nd coat, use new Poise latex.

Previously Painted Surfaces—One coat of new POISE flat latex will do an excellent job. If the paint film is in bad condition or a radical change in color is made, apply two coats of new POISE.

Application—Apply generously and evenly with brush, roller or spray. If thinning is necessary, use only a small amount of clean water and stir thoroughly. Wipe splatters immediately with a damp cloth. Wash brush or roller cover in luke warm soapy water immediately after use.

On most surfaces new POISE latex may be washed after two days. Two weeks drying time, however, is recommended.

Intermixing—New POISE latex colors may be intermixed. Do not tint with conventional paint or oil colors. Many beautiful Fashion Tints are available using O'Brien Tone-All Colors in White, Off White, Ivory and Medium Tone Tint Base. Do not use Tone-All Colorants in other standard colors.

LEAD FREE
DO NOT TAKE INTERNALLY
CAUTION!

Avoid prolonged contact with skin or breathing of spray mist. Close container after each use. Do not take internally. KEEP OUT OF THE REACH OF CHILDREN.
