P. R. Scaritto*

This is to confirm that EPA will make a routine inspection of the Burlington site, with regard to VCM compliance activities, on December 20, 1977. Both the Flemington and Pasadena Plants have been similarly inspected. The Agency officials will be interested in a plant tour, review of compliance projects, inspection of the continuous monitoring system, a discussion of our leak detection program, etc.

I suggest a pre-inspection review on Monday afternoon, December 19, 1977 with the appropriate personnel (*). Please advise if this is inconvenient.

J. P. Sandstedt
