(Whereupon, Plaintiff's Gabrielson Exhibit Number 6 was marked for identification.)

BY MR. IGNATOWSKI:

Q Can you please tell us what this particular slide shows, Doctor.

A This is a photograph from the Armed Forces Institute of Pathology on serosal tumors. That is, again, a commonly used textbook by pathologists.

In this slide virtually the entire chest and abdominal viscera have been removed. These are lungs up here, and this is the liver.

Here is the stomach, and here are the intestines. And in this particular case, the intestines have a tumor growing around them and, again, encasing them as a nodular or lumpy, bumpy appearance and grows all around the intestines.

This is a peritoneal mesothelioma.

Q Doctor, did you review the surgical report in the case of Mr. Jean Vandergucht?

A Yes, sir.

Q And did the surgical report describe the
