Erie, PA 16512

Attn: Ray Heidt

Dear Ray:

All future orders for Handy Rolls must have the OSHA caution notice on each roll. This can be done by a label or imprinting the wrapper, but not by a rubber stamp. The position the caution notice is to be placed on the wrapper is as illustrated on the attached sample.

According to Mr. Brown's letter of May 20, 1977 all asbestos products were to have an OSHA caution label, However none of the asbestos commercial paper or rollboard we have in stock has the label. Please check on this and advise.

Sincerely,

Raymond E. Leide
Operations Manager
