Material Safety Data Sheet
Both OSHA-20 and Dominion Foundries (Attached)

I would like to have a meeting with yourself, Sam, E. Crowley, and George Coffed to review and then determine an acceptable completed format for the Material Safety Data Sheet.

As you know, this data sheet is being requested by more of our customers.

If you look at the attached Hazardous Material characteristics, it is possible we could interpret this to NOT include our product.

However, I am anxious to resolve this situation once and for all. Attached is our standard form which we are now supplying and also a copy of Dominion Foundries sheet which is different.
