

12:28:07:10 draft, and people put their own two cents worth
 12:28:11:20 in, we should say this, and we should say that,
 12:28:13:30 and that is what comes up. But I don't think
 12:28:15:40 there was a vote. There was generally an
 12:28:18:50 agreement at the end of the thing that this is the
 12:28:22:60 wording. We didn't raise our hand to say yes, I
 12:28:26:70 vote yes or I vote no.

12:28:26:80 Q And you had mentioned that perhaps there
 12:28:28:90 was some discussion as to whether or not it should
 12:28:31:00 be a caution as opposed to a warning, and whether
 12:28:31:10 the word "cancer" should or should not appear. Do
 12:28:31:20 you recall discussions about that?

12:28:41:30 A I don't specifically recall discussions
 12:28:41:40 on that, but I'm sure there probably were
 12:28:41:50 discussions.

12:28:41:60 Q Is it your understanding that the
 12:28:51:70 industry, including the FMSI did not want the
 12:28:51:80 words "danger" and "cancer" to be included in this
 12:29:01:90 label?

12:29:02:00 A The FMSI really had nothing to do with
 12:29:02:10 it. The FMS -- the wording was selected by the
 12:29:02:20 people who served on the committee. I was the
 12:29:12:30 flunky who took the notes.

12:29:12:40 Q Sir, I am not being critical of you in
