Leonard Feitt and I were in the general purchasing office of the Gulf Oil Corporation, February 22, for the purpose of establishing an initial contact with this company and to get their guidance as to the approach we should make in establishing contacts with their divisional purchasing departments throughout the country.

We called on Mr. J. E. Christian at a very opportune time, as the Gulf Oil Corporation is now decentralizing its purchasing so that the following information should be used by each of you to contact the local purchasing agent, as shown below: -

Forest & Western Avenues
Staten Island 2, New York

Mr. H. W. Magee
Penrose Avenue at Lanier

To avoid any possibility of a misunderstanding, both plants listed for Ohio are in the Cincinnati territory and should be serviced from that point.

For your information, our materials are on their approved list of materials.

In the event any of you should have any questions arise as to purchasing approval of our material, then you should contact Mr. Leonard E. Feitt, our Pittsburgh Representative, who in turn will check with the general purchasing office, or where engineering approval is required, he will check with Mr. Fritz Braun in Pittsburgh.

This company should be added to your list of calls on which we require a call report.
