You can't wrap your house in cellophane

but—

WE CAN PAINT IT WITH... LEAD

Why do you see so many things wrapped in cellophane? Because the covering not only gives protection but also improves appearances. For the very same reasons people paint their homes.

Paint—good paint—does a double-barrelled job. It prevents deterioration and it adds much to the attractiveness of the home. We have standardized on Dutch Boy white-lead for our jobs because it is "the painter's paint." We mix it to suit the surface and tint it to suit the customer. And it wears long and never cracks or scales.

We will be glad to give you an estimate on painting your house with "lead."
