TO J.R. Fallon - St. Louis

CC J.S. Pullman - New York
Roger Irwin - Houston
Don Roush - St. Louis

Personnel Contacted: (Call with J.R. Fallon)

Richard W. Westeen - Pilot Plt. Engr.
Mr. Jin Fang - Mech. Engr.
Glenn Rasmussen - Mech. Engr.
Rolf Moen - Oper. Dept. (Snack Div.)
Don Emery - Central Q.C.
Dale Anderson - Q.C.
Dick Ziminski - Res. Engr. Dept.
Elmer Lee
Roy Singer
Jim Batastini
Gene Villeneuve

RESULTS:

This meeting was arranged to give all interested parties a chance to learn more about the use of Therminol in food frying applications and also to answer specific questions for Westeen and Fang regarding system design, toxicity, regulatory agencies etc. They are shortly to receive approval to install a heater in their pilot plant to fry a snack food.

Discussion was held on FR vs T-66 and T-66 will likely be the selected fluid. Some mention was made to T-55 vs. Mobiltherm. Moorhead seems to have the inside track on the heater.

If the pilot plant proves to be successful they would install a system about 20 times this large at their West Chicago Plant.

ACTION REQ'D: Roder: Send list of names, addresses and tel. no.'s to Westeen for possible contact in food installations.

Note: Rasmussen is just starting to work on a coffee roasting application and has shown some interest in using Therminol.

ATTN: J.S. Pullman: Do you know how Therminol is applied at Wilkins?
