

Air Hygiene Foundation,
4400 Fifth Avenue,
Pittsburgh, Pa.
February 24, 1939.

NOTE TO MEMBERS:

Enclosed is another bulletin in the series prepared by the Preventive Engineering Committee of Air Hygiene Foundation. The new bulletin deals with "Routine Sampling for Control of Atmospheric Impurities" and gives methods for determining some 40 substances more or less commonly found in industrial atmospheres. Extra copies, in addition to the regular membership allotment, are available at fifty cents each.
