LOWER BASEMENT

Yes. Thousands of them! Executives with the power to say "yes" to your message.

These are the decision-makers who dog-ear their Registers with day-after-day use, finding answers to *who's who, who's where,* and *who makes what* in American business.

All you do is put your best corporate foot forward.

The yes-men are bound to take notice.

Find out the astonishing low rates. Call collect:

STANDARD & POOR'S REGISTER

OF CORPORATIONS, DIRECTORS AND EXECUTIVES

1973

CORPORATION RECORDS

is designed to give complete background on companies in which 90% of all investor interest is believed to be concentrated.

Descriptions include corporate background, capitalization, bond and stock data, earnings and finances, subsidiaries, and products — all easily located — the greatest "in-depth" coverage of industrial descriptions in the world.

Executives use CORPORATION RECORDS to keep abreast of competitors' activities . . . Investors and Investment Managers rely on its vital investment data . . . Banks and Insurance Companies find it a source of investment information and a basis for independent research . . . Brokers and Dealers use it to provide the facts their customers expect.

WHAT IT INCLUDES:

The 6 Basic Volumes contain over 12,000 pages of comprehensive data on the finances, securities and backgrounds of the 6,300 largest corporations, with additional coverage of 2,000 corporations next in importance plus news reports on another 4,000 companies.

Latest developments on over 14,000 companies are reported five days a week in a separate Daily News Section.

Modern alphabetical arrangement and flexible loose-leaf format allows easy insertion of revised sections and makes it possible for several people to use the service at the same time. The six Corporation Records volumes and the Daily News Section may be purchased separately.

Introduction

BACKGROUND

Poor's Register of Corporations, Directors, and Executives was first published in 1928 by the then Poor's Publishing Company. At that time the Register represented the first major publishing effort in providing a national "Directory of Directors" covering the entire United States. Today, with this its 46th publication, Poor's Register is generally acknowledged as being the foremost guide to the business community and the executives who run it. It has since its inception maintained a progressive program for refinements and additions to its data and has in a sense reached out beyond the scope of a national publication with the inclusion of Canadian businesses and major international corporations. This has been done in recognition of the need for businessmen worldwide to reach the men who make "buying" decisions. Within its pages, the Register provides the richest market in the world for whatever product, proposition or service is being offered.

ARRANGEMENT of DATA

Poor's Register has been designed to provide easy access for whatever reference is being made. It is arranged into seven main sections, and also includes a separate Geographic Index and cumulative supplements.

Section 1—Standard Industrial Classification Index explains the construction and use of the SIC code numbers, and lists these numbers by major groups and by alphabetical and numerical division of major groups. This section may be used as a reference to determine quickly the appropriate SIC code number for the line of business in which a company is engaged.

Section 2—Standard Industrial Classification Codes lists corporations under the four Digit Standard Industrial Classification Codes which are arranged in numerical order. Approximately 900 different SIC codes provide a defined breakdown by a company's line of business. Many companies have multiple listings in this section depending on the various industrial activities in which the company is engaged.

Section 3—Corporate listings. Straight alphabetical sequence by business name of approximately 34,000 corporations including zip codes; telephone numbers; names, titles, and functions of approximately 231,000 officers, directors, and other principals; name of accounting firms; Standard Industrial Classification codes; annual sales and number of employees where available; division names and functions; subsidiary listings separate with reference to parent companies; principal business affiliation and address of executives, if other than the subject company.

Section 4—Individual listings–Directors and Executives Section. A straight alphabetical list of approximately 70,000 individuals serving as officers, directors, trustees, partners, etc. Provides principal business affiliations, business addresses, residence addresses and where obtainable year and place of birth, college and year of graduation and fraternal memberships.

Section 5—Obituaries section. Records the deaths of which publishers have been notified in the past year. For identification, each obituary shows the individual's principal business affiliation, business address, and, if available, the date of death.

Section 6—New company additions. A complete alphabetical list of the companies appearing in the Register for the first time. The principal business address is given for each company.

Section 7—New individual additions. A complete alphabetical list of individuals whose names appear in the Register for the first time. The principal business connection and business address is given for each individual.

Geographic Index. This separate index lists companies appearing in the Register geographically, by states. Business names are in alphabetical sequence.

Register Supplements. Register subscribers are entitled to interim supplements which contain details of changes which have occurred since publication of the annual volume. These supplements are usually published in April, July, and October of every year. Each supplement is cumulative and only the latest need be kept.

EDITORIAL COMPILATION and UPDATING PROCEDURES

The work of keeping the Register up to date is carried on throughout the twelve months of the year. Proo are sent annually to every listed corporation and individual for recording any pertinent changes since t

(Continued on next page)

publication of the preceding year's issue. Standard & Poor's computerized facilities are used in storing, updating, and photo composition of this data. Daily news services, press announcements, trade publications, Standard & Poor's own editorial staff, and of course individual contact by interested members within the business community have contributed to the completeness of this publication. In as large and comprehensive an undertaking as the Register these efforts result in extensive changes in our data from year to year. For example, the number of individual and corporate listings in which major changes occurred since our last edition is in excess of 100,000 and the number of actual revisions necessary to bring this edition completely up to date is over half a million. In effect, each edition becomes a "fresh" one with new opportunities for buyers and sellers alike to pinpoint their most profitable markets. There is, of course, no charge to be listed in Poor's Register.

OUR APPRECIATION

We again welcome this opportunity to thank all those individuals and corporations who have cooperated in reviewing proofs and responding to our requests; and particularly our subscribers for their loyalty and support as well as their helpfulness in calling to our attention changes in our corporate and executive listings. Without you there would be no Poor's Register. It is only through this joint participatory effort that we are able to present in this our forty-sixth annual edition a work of unusual thoroughness. Finally, we renew our commitment to continue, through the use of data-processing equipment, photocomposition techniques, and up to date professional publishing technology, our goal of providing maximum value to all users of the Poor's Register.

March 1973

STANDARD & POOR'S CORPORATION

Rule 144 • Shelf Registrations • Corporate Repurchases

An Important Message for

Corporate Officers, Accountants and Lawyers

If your business or professional activities include advising corporations or their stockholders regarding the sale of securities pursuant to Rule 144, the sale of securities registered on a shelf registration or the repurchase by a corporation of outstanding securities, you should know that Smith, Barney & Co. has a Corporate Services Department which specializes in handling buy and sell orders of the types indicated. Since these orders often involve special legal or marketing problems, our Corporate Services Department works closely with our legal staff and our Block Trading Department.

We are thoroughly acquainted with the legal considerations involved in these areas. We have had extensive experience.

As a result of our expertise and experience, together with our large institutional clientele and our major role in block trading and as a market maker, we are in a position to handle quickly, confidentially and in meticulous compliance with all applicable legal requirements, sales and purchases of the types referred to, at prices which, we believe, will be most advantageous to your clients.

Please address inquiries to Fulton E. Massengill, Vice President, Corporate Services Department, Smith, Barney & Co. Incorporated, 20 Broad Street, New York, N. Y. 10005, telephone 747-0014 (area code 212).
