Subject : LOSS CONTROL/ENVIRONMENT HEALTH

Date: December 31, 1985

RECEIVED
DEC 31 1985
Ans'd.....

Enclosed are copies of several loss control reports from ESIS that indicate some deficiencies that must be improved immediately.

In Denison, Texas an employee was exposed to asbestos levels in excess of OSHA permissible levels. At this plant and several others, the reports also indicate that employees are exposed to excessive noise levels.

Please review the enclosed information and confirm that the recommendations have been addressed so that these deficiencies will not reoccur.

Your prompt attention and cooperation on this matter is expected.
