

WILMINGTON, Del., May 14 -- The Du Pont Company has licensed Kikuchi Color and Chemical Corporation of Tokyo to produce "Krolor" pigment colors in Japan. Under terms of the agreement, Kikuchi received a license to make, use and sell such pigments under Japanese patent 699310.

"Krolor" pigment colors are silica-encapsulated lead chromate and lead-molybdate inorganic pigments. "Krolor" pigment colors are used in the paint and plastics industries for their heat stability, chemical resistance and lightfastness properties.

Kikuchi Color and Chemical produces and sells inorganic color pigments, primarily for use by the paint and plastics industries.
