SPOT CHECK ANALYSIS
AROCLOR 1016 HIGHER PCB HOMOLOGS

J. R. Savage - B2SL

T. L. Gossage - B2SL

R. H. Munch - T1B

W. B. Papageorge - B2NA

C. Paton - B2SH

W. R. Richard - T3A

Please check PCB analysis over the next 4 "running time" weeks at least one run per week of Aroclor 1016.

This check should be by our most accurate method and the one we used to present data to the Government PCB Task Force.

I'd like a comparison of these data results versus our "normal" PCB test method check now employed at Krummrich, realizing it is less precise and gives higher answers-- but we need to establish correlation, if any.
