Dr. R. Kehoe
University of Cincinnati
Cincinnati, Ohio.

Dear Sir:

I am about to start an investigation of lead tetraethyl and other lead alkyls from a toxicological point of view; we will also be concerned with the physical and chemical properties of these compounds. I contacted the Ethyl Corporation and their representative in San Francisco, Mr. Sievert, advised me to contact you before beginning my work. I would appreciate any references you can offer along with suggestions for our work. We are a Chemical Warfare Service organization and our work is solely for the army.

I thank you very much.

Very sincerely yours,

Master Sergeant Oscar P. Cohen
40th Chemical Laboratory Company
6th HQ Special Troops
II Armored Corps
San Jose, California
