Geraldine V. Cox, Ph.D.
Vice President/Technical Director
Chemical Manufacturers Association
2501 M Street, N.W.
Washington, D.C. 20037

Dear Dr. Cox:

This is to express the thanks of the Institute to your association for providing us with your August 6, 1982 report entitled "Research Techniques and Methods for the Detection and Prevention of Carcinogenesis in the Industrial Worker." This report will prove useful in our continuous updating of occupational hazard information. It will be used for internal NIOSH evaluations and will not interfere with the investigators' desire to publish the findings in a scientific journal.

Sincerely yours,

for *Vera W. Hudson*
