Mr. F. H. Langenheim - St.L.
Mr. E. P. Wheeler - St.L.

August 29, 1955

D. H. Kern, Commander
U.S.N. Design Superintendent
United States Government
Portsmouth Naval Shipyard
Portsmouth, New Hampshire

Dear Commander Kern:

Through previous contacts at the Portsmouth Naval Shipyard, we have learned that personnel at the yard are quite concerned over the toxicity of our Pydraul 150. In order to correct any concern on the part of your personnel, I should like to request permission to visit sometime during the week of September 19th with Mr. E. P. Wheeler, Assistant Director of our Medical Department, who will be on here from St. Louis, Missouri.

Within the very near future, we will have the exact date that Mr. Wheeler will be available and we would appreciate talking with personnel who will be concerned over the toxicity of our Pydraul 150.

Yours very truly,

Lee T. Johnson
