The heart of the data bank consists of files established covering the following subjects: (i) individual lawsuits, including significant pleadings and discovery; (ii) files on attorneys representing plaintiffs or defendants; (iii) files on medical experts including curricula vitae, memoranda of interviews, specialties and ratings; (iv) materials relating to the medical portion of the Committee's project; (v) responses to questionnaires transmitted by our firm to AIA/NA members; (vi) form pleadings and discovery; and (vii) source materials of a nature not included in the foregoing.

Members of AIA/NA are invited to direct requests for any information from the data bank to either Miss Carey Gross or myself at the offices of Cadwalader, Wickersham & Taft.

2. State of the Art Defense

Philip Enterline, PhD, has completed a survey of the English language, medical literature on the subject of the relationship between asbestosis/asbestos dust and lung cancer. Facing sheets and abstracts from materials reviewed have been provided to the Committee. Copies of the complete medical studies and reports reviewed by Dr. Enterline are available from our offices. We anticipate providing to
