

Your computer deserves a Floating Floors[®] system.

Here are five good reasons why Floating Floors elevated flooring systems belong in your computer room:

- 1. TOTAL ACCESS.** Simply lift a panel, and you have complete access to cables. Maintenance is easy. And system changes can be made quickly—with no downtime.
- 2. NO STATIC BUILD-UP.** The floor is completely grounded for safe, worry-free, continuous operation. That's a "plus" feature of non-magnetic aluminum.
- 3. RUST-FREE ENVIRONMENT.** There's no downtime caused by iron oxide infiltration. Corrosion-resistant aluminum won't rust, never needs painting. No paint, of course, means no paint flakes in the atmosphere.
- 4. TOTAL INTERCHANGEABILITY.** Every panel is a match; every one is edge-machined for absolute squareness. They can't bind or seize-up after computer is installed.
- 5. SAFETY.** These panels are fireproof. They're lightweight, easy to lift, won't hurt you if accidentally dropped. Proven application and continuous testing by the company that pioneered free access floors is your further guarantee of total safety.

There are more reasons why your computer should have the best available raised floor system—and your local Floating Floors distributor will be glad to outline them for you. Call him today. Or write National Lead Company, Floating Floors, Inc., Room 4617, 111 Broadway, New York, N.Y. 10006.
