OUR REF. K/ba

YOUR REF.

14th July, 1943.

Dr. Robert A. Kehoe,
College of Medicine,
University of Cincinnati, Ohio,
U. S. A.

Dear Bob,

I have a number of letters from you - all of very considerable interest, particularly at the present time. I am hoping to be able to reply to each one in the near future when I have a little more information to give to you. I shall also be writing you on an entirely different problem which has proved a rather serious one to us, and the details of which may, I believe, be both interesting and valuable to you. However, our information is not yet quite complete but I hope it will be in the course of the next week or two.

I sent a copy of your letter of 22nd May to Dr. Cassells, and as a matter of interest, attach hereto copy of his reply. I fully endorse his view that it would be virtually impossible for us, to-day, to obtain an adequate supply of rubber gloves. If therefore we are going to use gloves, we have no alternative to treated leather.

I shall be replying separately on the transportation problem to which you refer, but might mention here that our information is just about as uncertain as your own.

Kindest regards and best wishes,

Sincerely yours,
T. R. A. Bevan
