Dr. George Calingaert,
The Ethyl Corporation,
1600 West Eight Mile Road,
Ferndale 20, Detroit, Mich.

Dear Cal:

The question about the handling of requests for Ethyl Fluid in the Detroit Laboratory has come up again. So far as you and I are concerned, I think there is complete understanding and that no difficulties will arise. However, I am not certain that others in responsible positions in the Detroit Laboratory follow the same procedure that is indicated in your memorandum of March 12, 1943, to myself and Mr. Kaley. I do not wish to take any steps in this matter without your advise, but I would appreciate knowing whether you have knowledge of all shipments of this type made under the authority of the Detroit Laboratory. More specifically, I should like to know whether Bartholomew and Heron may send Fluid to people who are working with them collaboratively or to other groups or agencies, and whether they follow the same procedure that you have agreed to. On receipt of your information I shall know how to proceed further if necessary.

Sincerely yours,

Robert A. Kehoe, M. D.
