

May 15, 1969

TO: W. J. Sheehan

FROM: G. M. Brown

SUBJECT: 1970 Engineering Objectives

Regarding Steve's memo of May 1st, I have the following comments to make:

ITEM #3

Materials Engineering is to establish an outside source for #70 Asbestos, as this is a large item of my wet machine production, I'd like some detail as to how I'm to be affected. Target Date is July 1st, 1969.

ITEM #8

Materials Engineering is to develop a thick version of Victocor 300, here again I'd like some general information concerning this product. Target Date is July 1st, 1969.

ITEM #1

Application Engineering covers a composition Cylinder Head and Manifold Gasket for Model 71 - Chevrolet.

Is this to be a Raw Materials Division material? Information requested, Target Date is September 15th, 1969.

ITEM #3 & #4

Application Engineering covers composition Cylinder Head Gasket for International Harvester, again is this to be a Raw Material Division material? Information requested; Target Date is December 15th, 1969.

ITEM #5

Application Engineering covers Victocor 300 for Cummins, I'd like this product to be given more priority and if successful, possibly use this material as a substitute for the plate gaskets, which are a high scrap cost item.
