Joseph Watson	Contractor	Eastern Research Group (ERG)	Joe.Watson@erg.com
Lead Inspector:			
Vince Damiano	Vincent Damiano Digitally signed by Vincent Damiano Date: 2025.06.06 16:04:43 -04'00'		
	ERG	Vince.Damiano@erg.com	

SECTION I – INTRODUCTION**Site Entry and Purpose of the Inspection**

The Port of New Orleans and surrounding facilities were selected for inspection based on a Regional initiative to evaluate facilities at ports receiving or transporting Resource Conservation and Recovery Act (RCRA)-regulated hazardous wastes, and/or have an International Convention for the Prevention of Pollution from Ships (MARPOL) Annex V Certificate of Adequacy (COA) issued by the U.S. Coast Guard (USCG).

This report is based on information supplied by the facility representatives, inspector observations, port-related facilities, and other records, including photographs taken, verbal or written statements made during or after the on-site inspection, and/or materials shown, demonstrated, or submitted to the Environmental Protection Agency (EPA) during or after the on-site inspection. In addition, information gathered prior to or after the inspection from a review of EPA, State, and public records may be included in this report.

Attendees

Title/Organization	Name	Email	Opening Conf.	Closing Conf.
Lead Inspector/ Contractor/ERG	Vince Damiano	Vince.Damiano@erg.com	Yes	Yes
Inspector/Enforcement Officer/EPA Region 6	Sandesh Thapa	Thapa.Sandesh@epa.gov	Yes	Yes

Facility General Description

Tenant/Area	Inspection Date	Process Description	Area of Concern
American Environmental and Industrial Services, LLC	4/22/25	AEIS provides emergency response, remediation, and industrial cleaning services. The facility does not maintain a MARPOL COA.	No

SECTION II – OBSERVATIONS

Facility: American Environmental and Industrial Services, LLC			
Section: 2.1	Date: 4/22/25, 01:33 PM	Contains AOC: No	Contains CBI: No
Lead Inspector: Vince Damiano	Attendees: David Diamond (Manager) and Ryan Torres (Vice President)		
AEIS is located in New Orleans, LA and operates as an emergency response remediation company responding to environmental spills. AEIS also has an industrial cleaning operation where it conducts tank cleanings for clients and provides vacuum truck services. Mr. Diamond stated that any wastewater generated from tank cleanings is vacuumed out by the vacuum truck and brought straight for disposal. The only waste that would ever be brought back to AEIS is drummed-up diesel waste from spills or drummed-up used oil from spills. The drummed waste is typically in solid form because it is mixed with absorbent material to contain the spills. Mr. Diamond stated that if they ever do manage hazardous waste, it is never brought back to the facility and brought straight to the customer's designated disposal facility. AEIS is registered with the EPA as a transporter of hazardous waste and used oil. After the opening conference, the inspection team observed AEIS's waste storage area. The inspection team observed five full 55-gallon drums of non-hazardous diesel fuel mixed with absorbents inside the waste storage area. Mr. Diamond stated that non-hazardous waste or used oil is never kept on site for more than two weeks. The inspection team did not observe any areas of concern (AOCs) at the time of the inspection; however, further EPA review may change or add to their potential AOCs. A closing conference was conducted at approximately 2:00 PM with AEIS personnel.			

SECTION III – RECORDS REVIEW

No RCRA-regulated records were reviewed during this focused onsite inspection.

SECTION IV – AREAS OF CONCERN

Not Applicable

SECTION V – FOLLOW UP

Any facility follow-up items are as discussed in the observations in Section II. Documents or files provided by the facility were transmitted via email and included responses to AOCs or provision of documents requested.
