Subject: American Vermiculite Film

Date: December 7, 1972

You may recall the film shown at the Vermiculite Association convention. At the time I requested this film for our review. I have now received this film. If you are interested in seeing it, or showing it, please let me know.

You may recall that the only reference to vermiculite mining was at the beginning of the film. Nevertheless, it is an excellent film and interesting to review.
