U.S.D.

General - Protection of mechanical Contractors, etc.

He asks me to explain to you our desire to eliminate from the new Schedules to be printed, protection to above, is based on the wish of many of our Licensees who don't want it and do not use it.

This method, as I see it, would cover satisfactorily all objections you make in your letter of the 9th, and at the same time work no hardship on Licensees whose merchandise plan is upset by having the provision in the printed schedules.

Will you not give further consideration to this subject and
