Re:
Claim No. 420C 9639597 or 395C 2605812

Dear Rob:

Please contact Dr. Caputo's office in writing to determine the exact nature of the claimant's condition, the relationship of that condition to his December 1985 injury, and the nature of the surgery and its relationship to the December 1985 injury. Be sure to ask the doctor if any of this surgery is the result of the normal aging process.

Also, please obtain all the medical records for the treatment resulting from the December 1985 eye injury.

In addition, please schedule a second medical opinion based on the information received above.

If you need to discuss any of the above in greater detail, please give me a call. I trust that once all the medical information is received, we will be in a better position to make a determination.

Sincerely,

Anthony J. Colangelo
